

Thus, the results of the present study indicate that the use of a low-dose, long-term, continuous infusion of dexamethasone may be effective in the treatment of patients with glioblastoma who have failed to respond to standard therapy.

to continue until October 2000. The cost of living, wages and salaries have increased over the past year. However, the cost of living has increased at a rate faster than the growth in wages and salaries. This has led to the perception of wage stagnation. In addition, the government has not been able to meet its fiscal obligations and has had to borrow from the central bank. This has led to inflationary pressures and a decline in the value of the local currency. The Central Bank of Kenya has taken steps to combat inflation by increasing interest rates and reducing money supply. The government has also implemented various measures to improve the economy, such as privatisations, deregulation and fiscal discipline. These measures have helped to stabilise the economy and reduce inflation. The Central Bank of Kenya has also taken steps to combat inflation by increasing interest rates and reducing money supply. The government has also implemented various measures to improve the economy, such as privatisations, deregulation and fiscal discipline. These measures have helped to stabilise the economy and reduce inflation.

moreover, that there is no natural or man-made mechanism to limit the number of people that can be born. Therefore, we can, within our resources, increase the average population every decade. This is the reason why, despite the fact that the world's population has increased by 1.5 billion since 1950, the rate of increase has been declining. Today, world population growth is about 1.3% per year. This is the result of falling birth rates in developed countries and the increasing number of people in developing countries who are not yet married. In addition, the world's population growth is also being affected by the effects of migration. The net effect of migration on world population is difficult to estimate, but it is believed that it is currently positive, although it has been negative in the past. The net effect of migration on world population is currently positive, although it has been negative in the past.

and the 1990s. In response, the Chinese government has increased its efforts to combat corruption, particularly through the National Commission for Supervision of Discipline Inspection. The commission has been instrumental in investigating numerous corruption cases, including the 2013 conviction of Bo Xilai, former Party Secretary of Chongqing, and the 2014 conviction of Zhou Yongkang, former Politburo Standing Committee member. The commission has also overseen the investigation of several high-profile corruption cases involving foreign officials, such as the 2015 conviction of former South Korean president Park Geun-hye. The commission's focus on anti-corruption has been a key factor in the government's efforts to maintain political stability and economic growth.

and long time a member of the League against Secession
and now a member of the League for the Defense of the
Union and the Union League of Philadelphia. The
League against Secession was organized in 1861 by
Abraham Lincoln, George B. McClellan, and
John C. Frémont, and was composed of prominent
men from all parts of the country. It was
organized to oppose the Southern Secessionists, and
to support the Union cause. The League
against Secession was succeeded by the League for
the Defense of the Union, which was organized
in 1863 by George B. McClellan, John C. Frémont,
and other prominent men. The League for the
Defense of the Union was succeeded by the League for
the Defense of the Union, which was organized
in 1865 by George B. McClellan, John C. Frémont,
and other prominent men.

SHIN DONG-KEUN, b. 13 June 1959, Incheon, South Korea; Independent Researcher in Computer Science. m. Helen Chang, 2 sons. Education: Bachelor's Degree, Computer Science, University of California at Berkeley, USA, 1983; Doctor of Science, Computer Science, George Washington University, USA, 1991. Appointments: Discoverer of Shin sort, the best sorting method, 1998; Author of gospel songs, psalm and other songs; The first verifier of phenomenon of relatively good solutions; Author of the theory of massive cross-referencing; Developer of Shin Sort and Search (S³) Database System. Publications: A Comparative Study of Hash Functions for a New Hash-Based Relational Join Algorithm, 1991; A Sorting Method by Dong-Keun Shin, 1998; In 1999, Dr Shin informed the world's press organisations of the news that he discovered the best sorting method and his overwhelming victory in the decisive battle after claiming to be the greatest computer scientist in the world in 1997. Honours: Member, International Order of Merit; Founding Member,

American Order of Excellence; Several prizes and numerous nominations from international organisations; Listed in international biographical dictionaries. Address: Hwa Shin Building, Suite 701, 705-22 Yuktams-dong, Kangnam-gu, Seoul 135-080, Korea. Website: www.dkshin.com
